📌 Instructions

> ## 🛑 STOP — Read This First
>
> **Have you already been rejected? Do you already have a brand approval?** If so, you need to open a support ticket with HighLevel (or your CRM's support) and ask them to **wipe the brand registration** and start fresh.
>
> **Why?** There will be a mismatch between the site you originally used for the brand and the A2P Wizard-generated site in the campaign. It only takes about 5 minutes to wipe the brand and get it re-approved, but skipping this step can cost you **weeks of headaches**.

💡 Pro Tip

> **Tip!** Update your business profile in HighLevel (or your CRM) to match the output from A2P Wizard. You can change it back as soon as you get approved. It also helps to set the business email to the email generated on your A2P site.
